The 1860 Craven County, North Carolina Federal Census

The goal of this work was to produce a modern transcription, faithful to the original in format and fully indexed by the original page numbers.

The original spelling of names in the document has been preserved. The complete indexing of surnames is intended to overcome any difficulties in the original spelling. Due to differences in the original spelling and the enumerator's understanding, the index should be examined for other common spellings of a surname, i.e., Withrington, Weatherington, Wetherington, Worthington, Wethington, etc.

Schedule 1 Free Inhabitants

The 1860 Craven County Federal Census was enumerated by two Assistant Marshals. James H. Mason tallied the South side of Neuse River including New Berne and George Reel tallied the North side of the Neuse River. The data has been presented in the microfilm record order and some pages are annotated where they are out of sequence from the actual enumeration.

Also following the original work, note the omission of a person's color denotes white, where only black or mulatto was documented. The original ticks denoting marriage, schooling, and literacy have been changed respectively to M, S, or X for clarity. Additional notes appear in italics in Column 13. Illegible entries are represented by '. . .' and questionable transcriptions are annotated with a '?'.
